

# **Profile Report**

**Ella Explorer** 

11 July 2016

**CONFIDENTIAL** 

### Introduction

This report should be used in conjunction with professional judgment. The statements it contains should be viewed as hypotheses to be validated against other sources of data such as interviews, biographical data and other assessment results. All information in the report is confidential and should be treated responsibly. The 16pf®5 Administrator's Manual contains background information and detailed explanations of the material covered in this report.

### **Response Style Indices**

#### Norm group

#### GB combined-sex (2011)

All of the response style indices are within the normal range: there is no indication that it is necessary to question any of them.

### **Impression Management**

The individual has presented a self-image that is neither markedly self-critical nor overly positive.

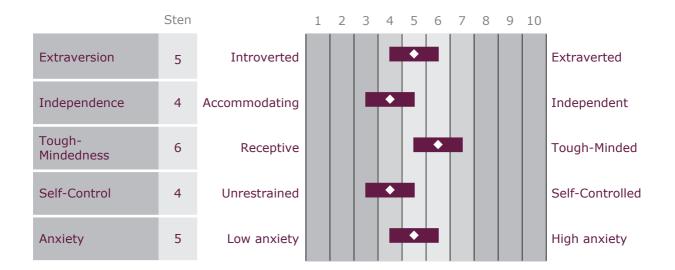

### **Acquiescence**

The individual has responded in a way that is not acquiescent; that is, they have not simply agreed with each statement. However, the style of responding could also be compatible with someone who has endorsed either a majority of 'b' ('?') or 'c' ('false') responses. Therefore the Infrequency index should be carefully examined in order to assess the extent to which their responses may be unorthodox or unusual.

#### **Infrequency**

The individual has endorsed most items in a way that is similar to other people; it is unlikely that they have responded randomly.

## **Global Factors**

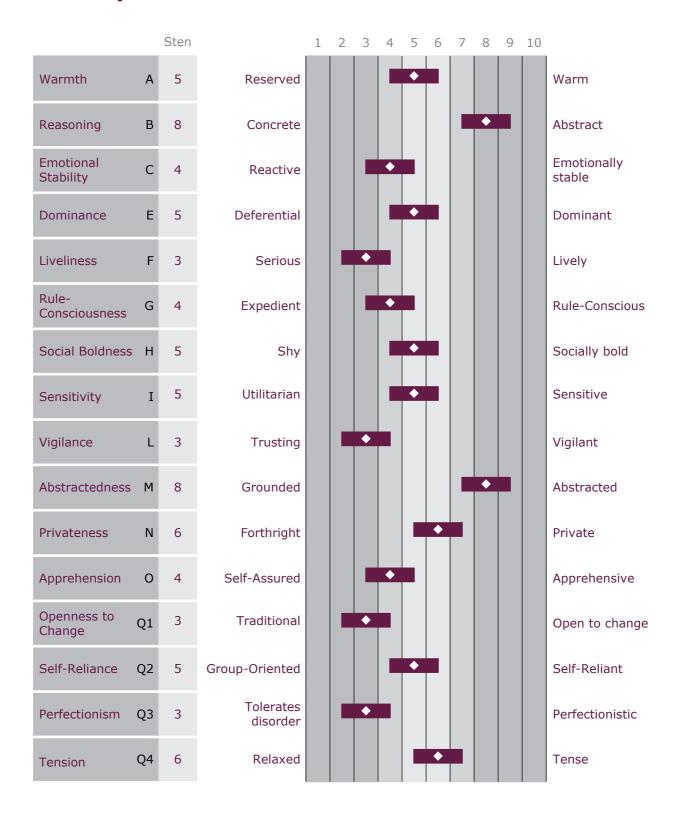

#### **Global Factor definitions**

### **Contributing Primary Factors**

Extraversion Social orientation; the desire to be around others and be noticed by them; the energy invested in initiating and maintaining social relationships.	A: F: H: N: Q2:	Warmth Liveliness Social Boldness Privateness (-) Self-Reliance (-)
Independence The role a person assumes when interacting with others; the extent to which they are likely to influence or be influenced by the views of other people.	E: H: L: Q1:	Dominance Social Boldness Vigilance Openness to Change
Tough-Mindedness  The way a person processes information; the extent to which they will solve problems at an objective, cognitive level or by using subjective or personal considerations.	A: I: M: Q1:	Warmth (-) Sensitivity (-) Abstractedness (-) Openness to Change (-)
Self-Control Response to environmental controls on behaviour; internal self-discipline.	F: G: M: Q3:	Liveliness (-) Rule-Consciousness Abstractedness (-) Perfectionism
Anxiety Emotional adjustment; the types of emotions experienced and the intensity of these.	C: L: O: Q4:	Emotional Stability (–) Vigilance Apprehension Tension

<sup>(-)</sup> Indicates a negative relationship between the Global and Primary Factor
